Does anyone know how to use VBA to pull data from SAP Netweaver?I have a number of daily reports that require exporting data from SAP to Excel and formatting it into a report.. * Split record at delimiter and append to data table DATA: It_values TYPE STANDARD TABLE OF text1024, “Table of values ls_value LIKE LINE OF It_values.. Is there a way to easily update my table in the second system with the file provided from the first system? If needed, I can export the data in the 3 other format types (Spreadsheet, Rich text format and HTML format).
